

# Quick-Up Bar Table

## Technical requirements for printed Quick-Up Bar Table tabletops

- Minimum film sizes for a full size table-top imprint  $\varnothing$  89 cm (diameter) ( $\varnothing$  85 cm +  $\varnothing$  7 cm edge +  $\varnothing$  3 cm margin cut)
- Maximum film deviation from exact tabletop center: 1.5 cm (tolerance)
- Logos and artwork should be planned with a 5 cm distance from the edge of the tabletop in order to prevent potential image distortion
- Light color schemes have considerable advantages over dark ones:
  - o Slight color deviations may occur as dark or black color schemes may heat up under sunlight.
  - o Full-tone dark surfaces may occasionally become slightly cloudy due to resin accumulation during pressing.

## Guidelines for printing your graphics on the column
